

Automate AP Invoice Uploads in Oracle Fusion Cloud using ADFdi

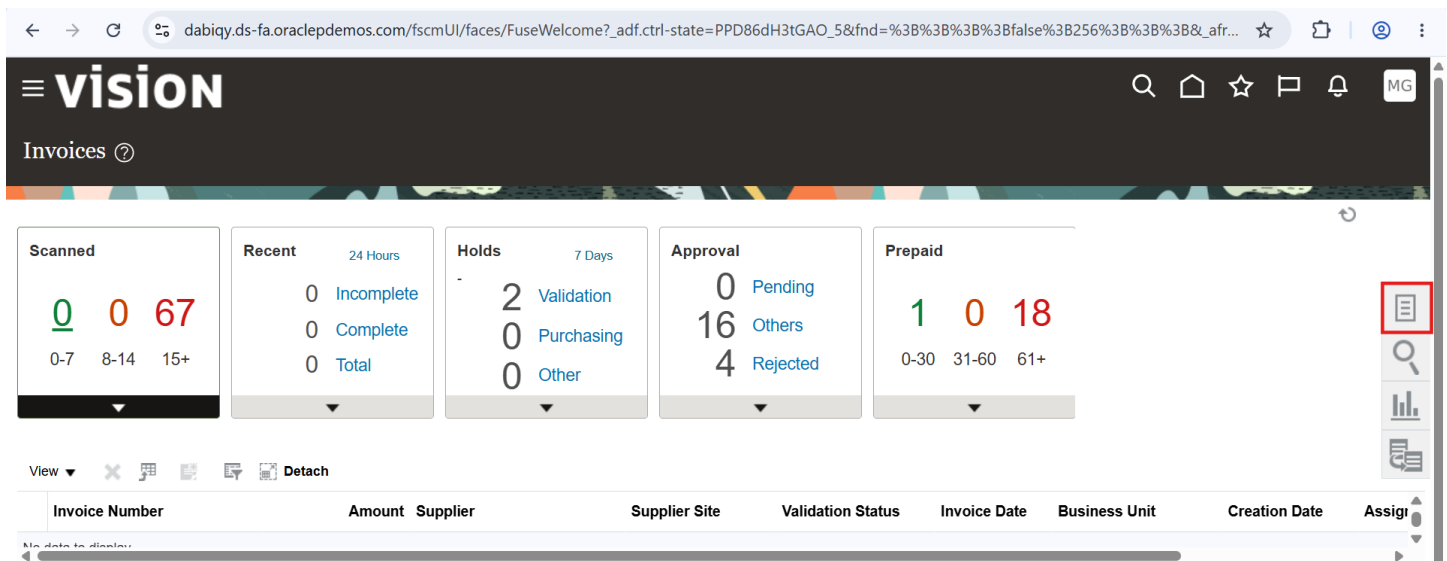

Application Development Framework Desktop Integration (ADFdi)

1. Click the **Home icon**, navigate to the Payables tab on the Springboard, and select the Invoices icon.

1. Select Payables tab and click on Invoices.

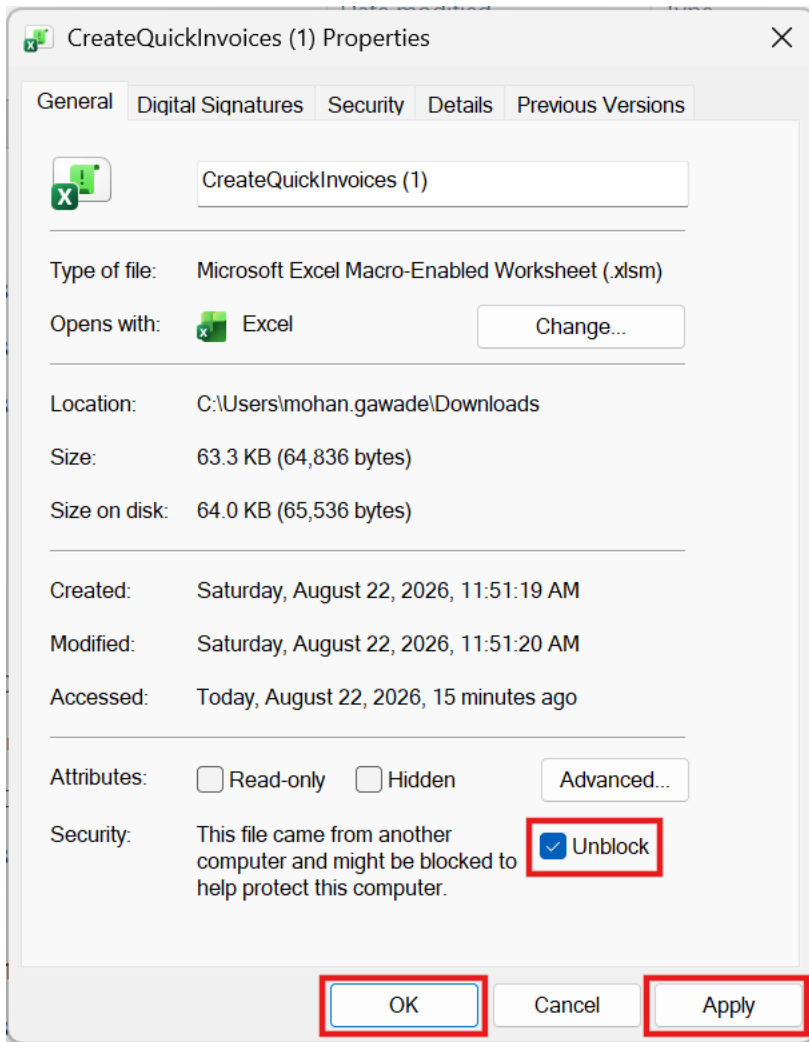

1. In the Invoices workspace, click the task pane icon on the right side of the screen.

The screenshot shows the Oracle Vision Invoices interface. The top navigation bar includes the 'vision' logo and 'Invoices' with a help icon. The main content area displays five summary cards: Scanned (0-7, 8-14, 15+), Recent (24 Hours), Holds (7 Days), Approval, and Prepaid. A sidebar on the right contains a list of actions, with 'Create Invoice from Spreadsheet' highlighted in a red box. A red box also highlights the 'Invoices' icon in the sidebar.

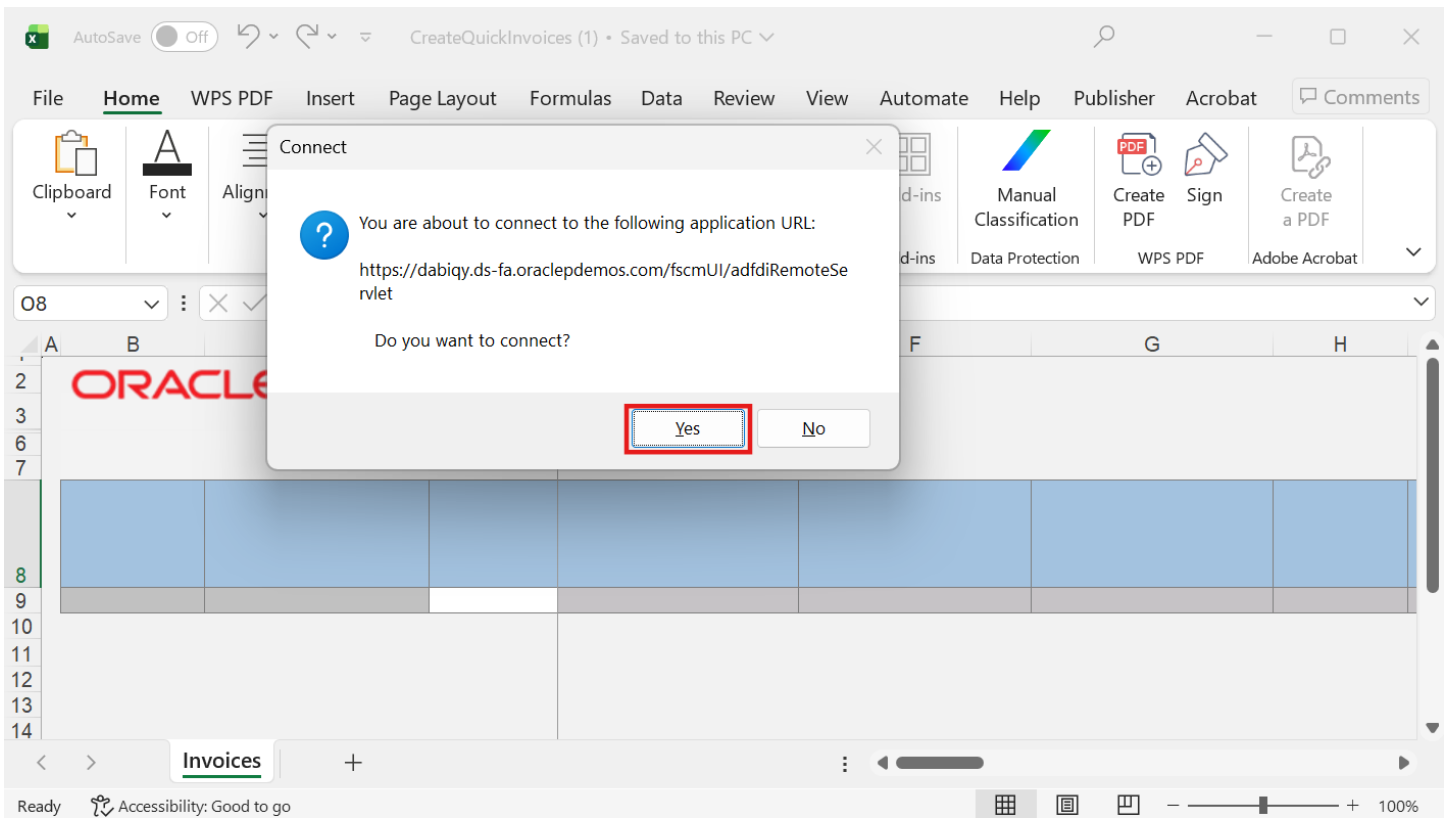

1. select the "Create Invoice from Spreadsheet" tab.

The screenshot shows the Oracle Vision Invoices interface with a download notification. A red box highlights the download icon in the top right corner. Another red box highlights the download notification for 'CreateQuickInvoices (1).xism' (63.3 KB) in the top right corner.

1. Above Screenshot Shows the browser downloaded Spreadsheet file.
2. After downloading **CreateQuickInvoices.xism**, right-click the file to access Properties, check the "Unblock" box under Security, and click Apply.

1. Above Screenshot Shows the file properties unblock action.
2. Click on Unblock→Apply→Ok

1. Open the Excel file and click "**Yes**" to connect to the ADFdi remote servlet application URL.

1. Enter your Oracle Cloud **username and password** in the Sign In popup, then click "Next".

WPS Office interface showing the 'Create Invoices' ribbon tab. The ribbon includes tools for Login, Logout, Clear All Data, Edit Options, About, Save, Save and Submit Invoice Import, and Status Viewer. The spreadsheet displays the 'ORACLE Create Invoices' worksheet with columns for Invoice details.
