

- **Oracle Fusion SCM – PIM Series(Part 1)**
setup of Item Types for OPPO Enterpris

- **Prepared by: [Chinna Narasimhulu Gadena]**

- **Introduction :**

Product Information Management (PIM) is the foundation for managing product data in Oracle Fusion.

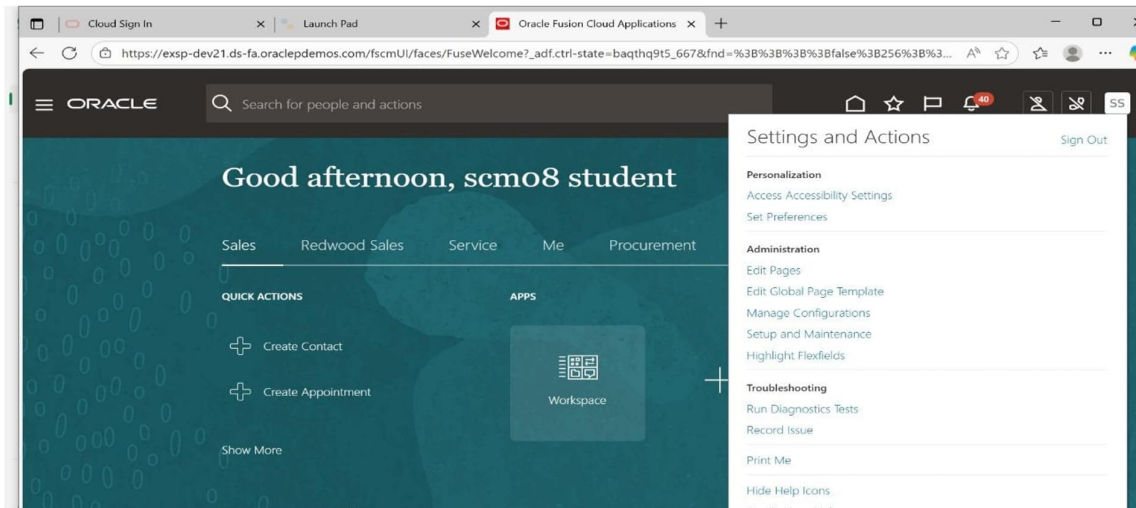

In this part, we will create and configure Item Types for OPPO Enterprise.

➤ Navigation Setups :

Step 1: Navigate to Manage Item Types

From the Home Page, go to:

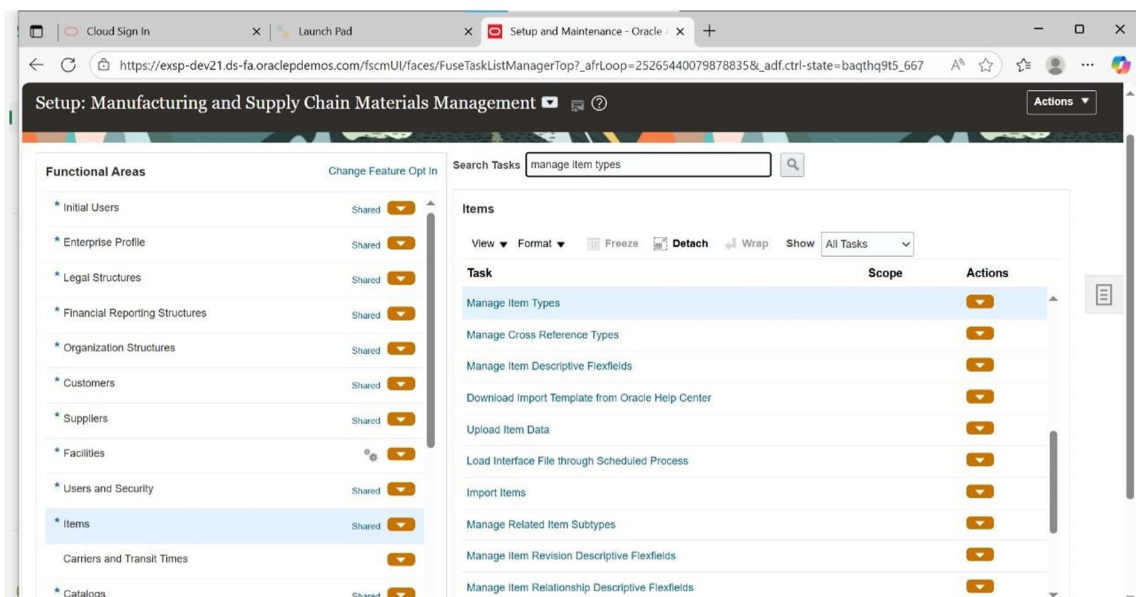

→ Settings and Actions → Setup and Maintenance

This is where you access Setup and Maintenance to start configuration.

Step 2: Search Task

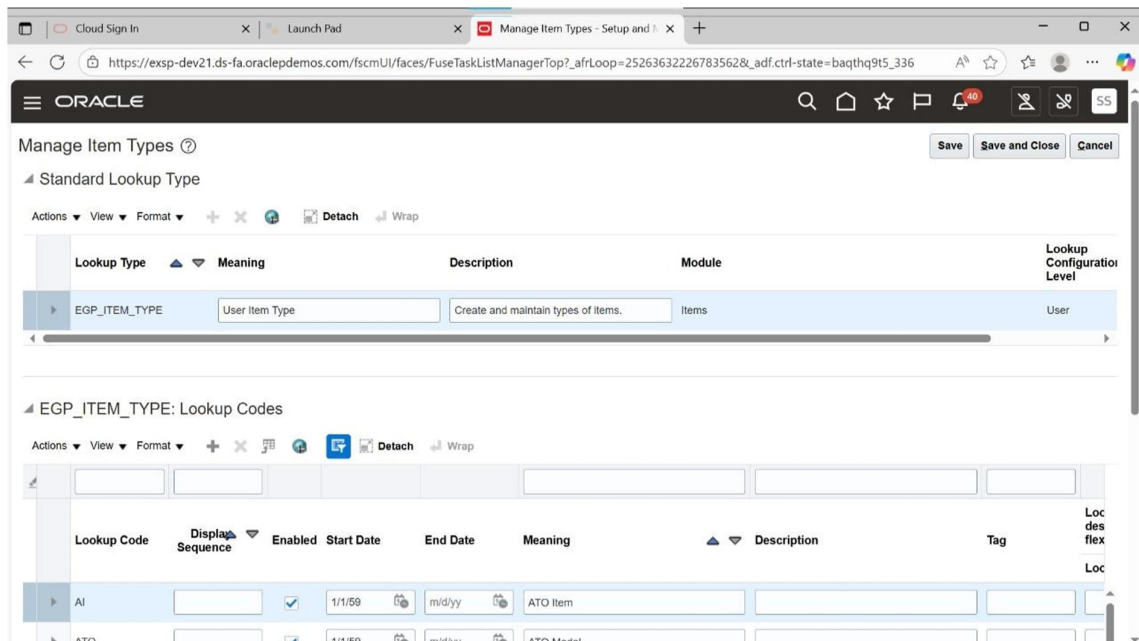

In the Setup and Maintenance screen, search for Manage Item Types.

This task allows us to create and maintain custom Item Types.

Step 3: Open Manage Item Types Task

Click on Manage Item Types to open the standard lookup.

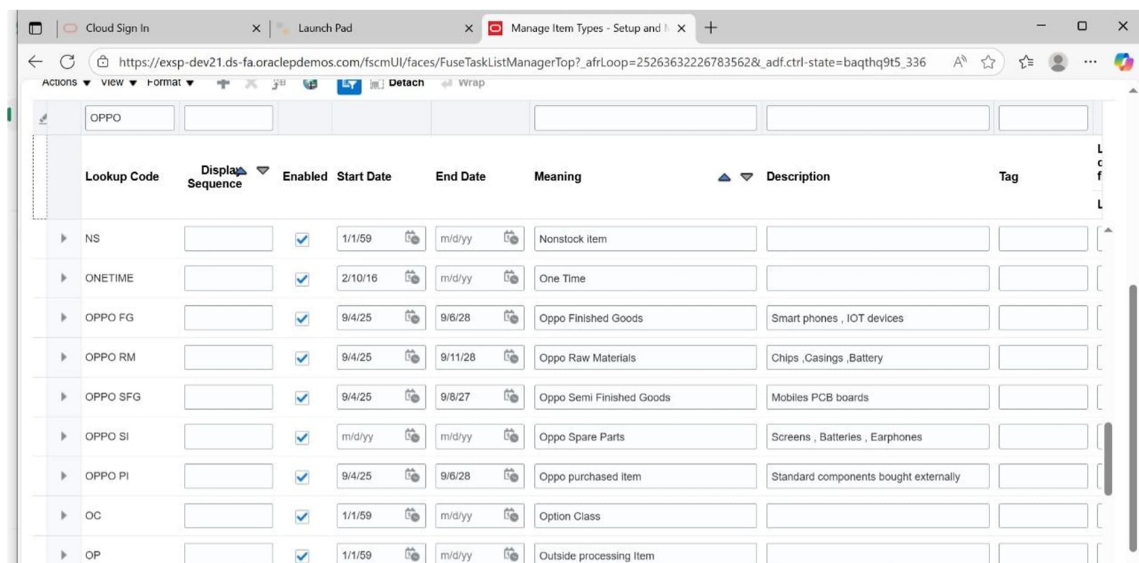

Lookup Type	Meaning	Description	Module	Lookup Configuration Level
EGP_ITEM_TYPE	User Item Type	Create and maintain types of items.	Items	User

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag
AI		☒	1/1/59	m/d/yy	ATO Item		
ATO		☒	1/1/59	m/d/vv	ATO Model		

This shows the list of standard item types provided by Oracle.

Step 4: Add OPPO-Specific Item Types

Now we will create custom Item Types for OPPO.

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag
NS		☒	1/1/59	m/d/yy	Nonstock item		
ONETIME		☒	2/10/16	m/d/yy	One Time		
OPPO FG		☒	9/4/25	9/6/28	Oppo Finished Goods	Smart phones , IOT devices	
OPPO RM		☒	9/4/25	9/11/28	Oppo Raw Materials	Chips ,Casings ,Battery	
OPPO SFG		☒	9/4/25	9/8/27	Oppo Semi Finished Goods	Mobiles PCB boards	
OPPO SI		☒	m/d/yy	m/d/yy	Oppo Spare Parts	Screens , Batteries , Earphones	
OPPO PI		☒	9/4/25	9/6/28	Oppo purchased item	Standard components bought externally	
OC		☒	1/1/59	m/d/yy	Option Class		
OP		☒	1/1/59	m/d/yy	Outside processing item		

Here we created OPPO FG, OPPO RM, OPPO SFG, OPPO PI, and OPPO SI to represent OPPO's product lifecycle

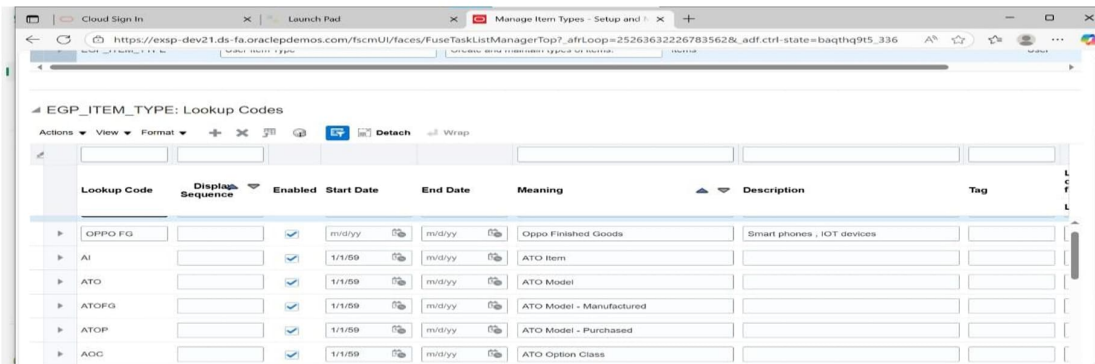

Step 5: Example Entry

Let's take the example of OPPO Finished Goods (OPPO FG):

>Lookup Code: OPPO FG

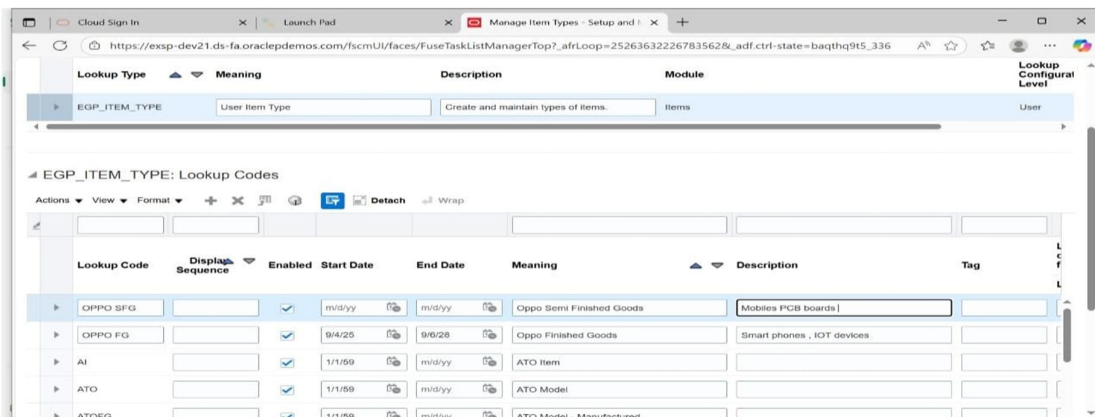

>Meaning: Oppo Finished Goods

>Description: Smartphones, IoT Devices

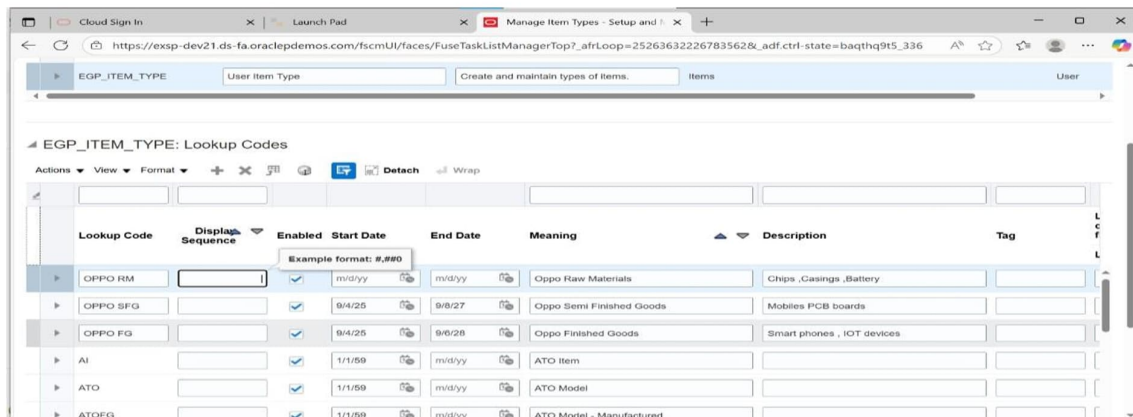

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag
OPPO FG		☒	m/d/yy	m/d/yy	Oppo Finished Goods	Smart phones , IOT devices	
AI		☒	1/1/59	m/d/yy	ATO Item		
ATO		☒	1/1/59	m/d/yy	ATO Model		
ATOFG		☒	1/1/59	m/d/yy	ATO Model - Manufactured		
ATOP		☒	1/1/59	m/d/yy	ATO Model - Purchased		
ACC		☒	1/1/59	m/d/yy	ATO Option Class		

➤ For Semi Finished Goods

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag
OPPO SFG		☒	m/d/yy	m/d/yy	Oppo Semi Finished Goods	Mobiles PCB boards	
OPPO FG		☒	9/4/25	9/6/28	Oppo Finished Goods	Smart phones , IOT devices	
AI		☒	1/1/59	m/d/yy	ATO Item		
ATO		☒	1/1/59	m/d/yy	ATO Model		
ATOFG		☒	1/1/59	m/d/yy	ATO Model - Manufactured		

➤ For Raw Materials

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag
OPPO RM		☒	m/d/yy	m/d/yy	Oppo Raw Materials	Chips ,Casings ,Battery	
OPPO SFG		☒	9/4/25	9/6/28	Oppo Semi Finished Goods	Mobiles PCB boards	
OPPO FG		☒	9/4/25	9/6/28	Oppo Finished Goods	Smart phones , IOT devices	
AI		☒	1/1/59	m/d/yy	ATO Item		
ATO		☒	1/1/59	m/d/yy	ATO Model		
ATOFG		☒	1/1/59	m/d/yy	ATO Model - Manufactured		

➤ For Purchased Items

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag
OPPO PI		✓	m/d/yyyy	m/d/yyyy	Oppo purchased item	Standard components bought externally	
OPPO RM		✓	9/4/25	9/11/26	Oppo Raw Materials	Chips ,Casings ,Battery	
OPPO SFG		✓	9/4/25	9/8/27	Oppo Semi Finished Goods	Mobiles PCB boards	
OPPO FG		✓	9/4/25	9/6/28	Oppo Finished Goods	Smart phones , IOT devices	
AI		✓	1/1/59	m/d/yyyy	ATO Item		
ATO		✓	1/1/59	m/d/yyyy	ATO Model		

This shows the details of OPPO-specific item types with description.

Step 6: OPPO Item Type Table

The below table summarizes all OPPO-specific Item Types:

Lookup Code	Item Type Name	Example	Description
OPPO FG	Oppo Finished Goods	Smartphones, IoT devices	Final products ready
OPPO RM	Oppo Raw Materials	Chips, Casings, Battery	Raw input components
OPPO SFG	Oppo Semi-Finished	Mobile PCB boards	Intermediate assemblies
OPPO SI	Oppo Spare Items	Screens, Batteries	spare items
OPPO PI	Oppo Purchased Items	External standard parts	Bought externally

Key Takeaways:

Item Types form the foundation of PIM. They help in reporting, costing, procurement, and product tracking. We created OPPO-specific Item Types to match OPPO's enterprise structure.

Next Steps in PIM Series:

And next parts, we will configure:

Part 2: Item Status

Part 3: Item Life Cycle Phases

Part 4: UMO

Part 5: Item Classes

Part 6: Item Catalogs

Part 7: Item Categories.
