

Oracle Fusion Cloud FBDI

Supplier Data Upload

1 Prepare 2 Generate ZIP 3 Load Interface 4 Validate 5 Import 6 Review

Goal: load new suppliers from an FBDI spreadsheet into Oracle Fusion Cloud Procurement, validate the interface records, run Import Suppliers, and troubleshoot rejected records.

Part 1 Prepare and Load Supplier Data

ORACLE Fusion Cloud Procurement ABC Company
Supplier Data Migration / Setup

1 Prepare Supplier FBDI Template
Download and complete the Supplier FBDI template

SupplierImportTemplate.xlsx

2 Generate Data File
Validate and create CSV file, then ZIP it

Generate File

☒ Validate

☐ Generate CSV File

+

SupplierImport.csv SupplierImport.zip

3 Load Interface File for Import
Submit "Load Interface File for Import" process

Process Details

Name: Load Interface File for Import

Description: Transfers setup or transaction data files from a client computer to the server.

Schedule: As soon as possible

Basic Options

Import Process: Import Suppliers

Data File: SupplierImport.zip

Submit Cancel

Part 2 Import and Validate Suppliers

ORACLE Fusion Cloud Procurement ABC Company
Supplier Data Migration / Setup

4 Data in Interface Table
Data is loaded to POZ_SUPPLIERS_INT

POZ_SUPPLIERS_INT
(Interface Table)

Key Columns (Example)

VENDOR_INTERFACE_ID
BATCH_ID
VENDOR_NAME
IMPORT_ACTION (CREATE/UPDATE/DELETE)
PROCESS_STATUS
ERROR_MESSAGE
CREATION_DATE
CREATED_BY

5 Run Import Suppliers
Submit "Import Suppliers" process to validate and import

Process Details

Name: Import Suppliers

Description: Creates and updates suppliers from data in the interface table.

Schedule: As soon as possible

Basic Options

Import Options: New

Report Exceptions Only: No

Batch ID: ABC_SUP_20260914

Submit Cancel

Part 3 Monitor Results and Created Suppliers

ORACLE Fusion Cloud Procurement ABC Company
Supplier Data Migration / Setup

6 Monitor and Validate
Check process status, review output and validate data

Process Monitoring (ESS)

Name	Process ID	Status	Submission Time
Load Interface File for Import	9536792	Succeeded	6/3/26 7:39 PM UTC
Import Suppliers	9536867	Succeeded	6/3/26 7:45 PM UTC

7 View Report and Validate in Fusion/BI Publisher
Review Suppliers Import Report and validate created suppliers

ORACLE Suppliers Import Report

Report Date: 6/3/26 7:45 PM GMT+00:00

Page: 1 of 6

Request ID: 9536867

Import Summary

Import Options: New

Report Exceptions Only: No

Batch ID: ABC_SUP_20260914

Import Outcome

Import Outcome	Record Count
Suppliers Not Imported	20
Suppliers Imported	1

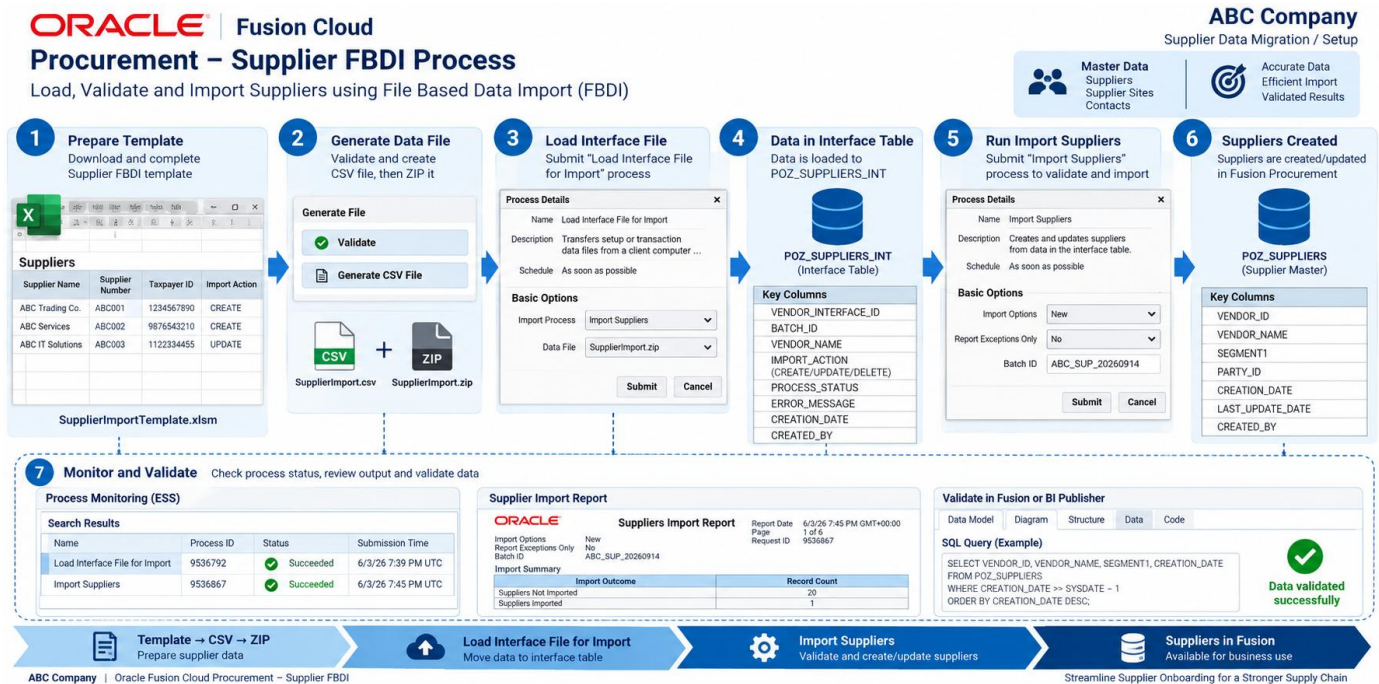

POZ_SUPPLIERS
(Supplier Master)

ABC Company | Oracle Fusion Cloud Procurement – Supplier FBDI

Streamline Supplier Onboarding for a Stronger Supply Chain

1. What FBDI Does

File-Based Data Import (FBDI) is Oracle Fusion Cloud's bulk file import pattern.

You prepare data in the Oracle spreadsheet template,

generate CSV files and a ZIP archive,

load the ZIP to **interface tables**,

and then run the application **import process** to create or update application data.

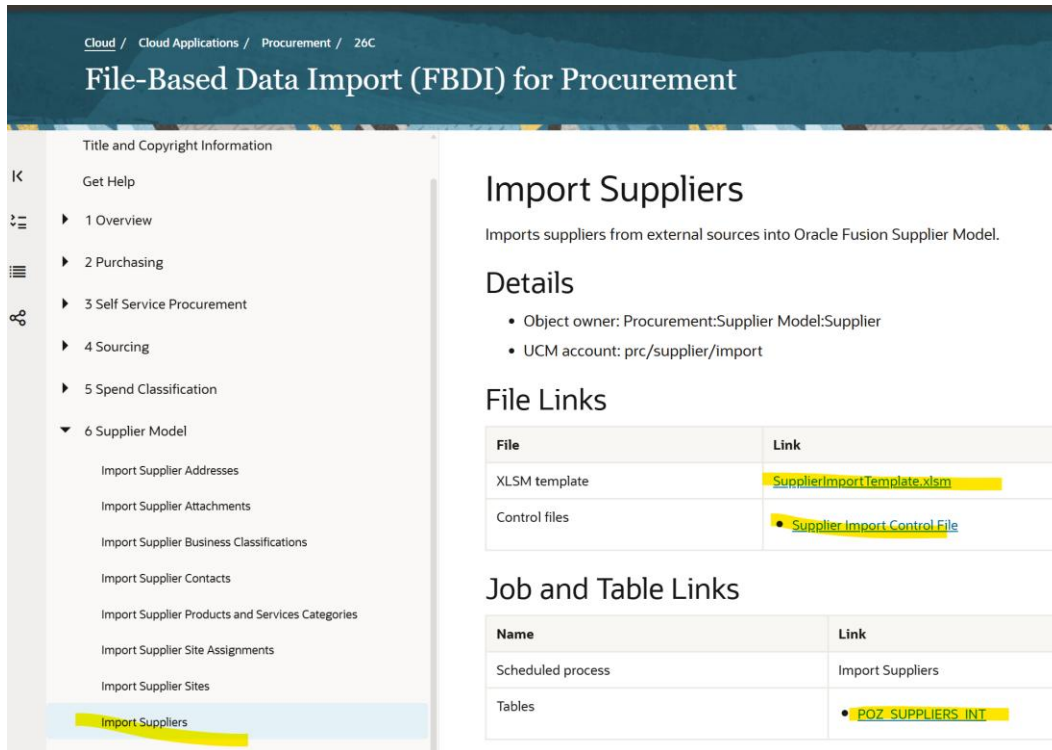

Guide note: For supplier import, the main **interface table is **POZ_SUPPLIERS_INT**. Batch ID is an identifier used to select which interface records an import process should pick up.**

Tour Scenario

Company	ABC Company
Object	Suppliers
Template	SupplierImportTemplate.xlsm
ZIP	PozSuppliersInt_ABC_20260914.zip
Batch ID	ABC_SUP_20260914
Example result	18 imported; 2 rejected

2. Prepare the Supplier FBDI File

[Download the supplier FBDI template](#) for your Oracle Fusion Cloud Procurement release. Populate the required supplier attributes, keep the spreadsheet structure intact, and use a controlled Batch ID.

Cloud / Cloud Applications / Procurement / 26C

File-Based Data Import (FBDI) for Procurement

Title and Copyright Information

 - Import Supplier Site Assignments
 - Import Supplier Sites
 - Import Suppliers**

Import Suppliers

Imports suppliers from external sources into Oracle Fusion Supplier Model.

Details

- Object owner: Procurement:Supplier Model:Supplier
- UCM account: prc/supplier/import

File Links

File	Link
XLSM template	SupplierImportTemplate.xlsm
Control files	Supplier Import Control File

Job and Table Links

Name	Link
Scheduled process	Import Suppliers
Tables	POZ_SUPPLIERS_INT

For new supplier rows, the import action is **CREATE**.

BATCH_ID	IMPORT_ACTION	VENDOR_NAME	BUSINESS_RELATIONSHIP	COUNTRY
ABC_SUP_20260914	CREATE	ABC Office Supplies	SPEND_AUTHORIZED	SA
ABC_SUP_20260914	CREATE	ABC Industrial Services	SPEND_AUTHORIZED	SA
ABC_SUP_20260914	CREATE	ABC Training Solutions	PROSPECTIVE	AE

- Do not reorder or delete template columns.
- Use the template instructions to generate the CSV/ZIP package.
- Keep the Batch ID consistent from spreadsheet through Import Suppliers.

3. Load the ZIP to the Supplier Interface

Navigate to Tools > Scheduled Processes.

Schedule Load Interface File for Import.

Select Import Suppliers and choose the generated ZIP file.

Oracle Fusion Cloud Applications

ABC Company | Training Environment

Process Details

Tools > Scheduled Processes

Load Interface File for Import

Transfers transaction data files from content storage to application interface tables.

Basic Options

Import Process

Import Suppliers

Data File

PozSuppliersInt_ABC_20260914.zip

Submission Notes

ABC supplier FBDI guided-tour load

1

Select Import Suppliers.

2

Choose the ZIP generated by the FBDI template.

3

Use notes to identify the test or migration run.

4

Submit and record the Process ID.

Guided screen 1 — Load Interface File for Import.

Training example | Oracle Fusion Cloud Procurement | September 2026

4. Confirm the Interface Load

Search by the returned **Process ID**. Succeeded means the file-to-interface stage completed.

Oracle Fusion Cloud Applications

ABC Company | Training Environment

Scheduled Processes

Search Results

Name	Metadata Name	Process ID	Status	Scheduled Time
Load Interface File for Import	InterfaceLoaderController	9842101	Succeeded	14-Sep-2026 8:30 PM

Actions

View Log

Attachments

1

Succeeded confirms the ZIP was loaded to interface tables.

2

It does not yet confirm that suppliers were created.

Guided screen 2 — Scheduled Processes: interface load succeeded.

5. Optional Diagnostic Check in BI Publisher

When troubleshooting and when your security policy permits it, use a narrowly scoped BI Publisher diagnostic query against the Procurement interface table. Filter by Batch ID instead of querying the entire interface.

Oracle Analytics Publisher ABC Company | Training Environment

Data Model - Supplier FBDI Diagnostic Catalog > Data Models

Data Model

Data Sets
Supplier_Interface_Check

SQL Query

Data Source: ApplicationDB_FSCM Type of SQL: Standard SQL

SQL Query

```
SELECT vendor_interface_id, batch_id, vendor_name, import_action
FROM poz_suppliers_int
WHERE batch_id = :P_BATCH_ID
ORDER BY vendor_interface_id
```

OK Cancel

1 Use FSCM data source for Procurement objects.

2 Filter by Batch ID; avoid SELECT * for routine diagnostics.

Guided screen 3 — BI Publisher diagnostic query for POZ_SUPPLIERS_INT.

```
SELECT VENDOR_INTERFACE_ID, BATCH_ID, VENDOR_NAME, VENDOR_ID, IMPORT_ACTION,
       CREATION_DATE, CREATED_BY
FROM POZ_SUPPLIERS_INT
WHERE BATCH_ID = :P_BATCH_ID
ORDER BY CREATION_DATE DESC;
```

6. Run Import Suppliers

Schedule Import Suppliers. For this example choose New, set Report Exceptions Only to No, and enter ABC_SUP_20260914 as the Batch ID.

Oracle Fusion Cloud Applications

ABC Company | Training Environment

Process Details

Tools > Scheduled Processes

Import Suppliers

Creates or updates suppliers from data staged in the supplier interface.

Basic Options

Import Options New	1 For this new-supplier example, choose New.
Report Exceptions Only No	2 No gives the full import report; Yes limits it to exceptions.
Batch ID ABC_SUP_20260914	3 Enter the same Batch ID used in the spreadsheet.

Submit

Cancel

Guided screen 4 — Import Suppliers parameters.

7. Monitor the Import Job

Search for the Import Suppliers process.

If it ends in Error, do not immediately reload everything. First review the output and log to determine which records were rejected and why.

Oracle Fusion Cloud Applications

Attachments

1

Error at Import Suppliers usually requires reviewing output and log.

2

Correct rejected records, then reprocess the intended batch.

Guided screen 5 — Import Suppliers returned Error.

8. Review the Suppliers Import Report

The output report summarizes imported and rejected records. This tutorial uses a fictional result of 18 imported suppliers and 2 rejected suppliers.

Oracle Fusion Cloud Applications

ABC Company | Training Environment

Suppliers Import Report

Scheduled Process Output

Suppliers Import Report

Import Options New
Report Exceptions Only No
Batch ID ABC_SUP_20260914

Import Summary

Import Outcome	Record Count
Suppliers Not Imported	2
Suppliers Imported	18

- 1

Use the report to identify rejected records and validation messages.
- 2

Fix source data, regenerate the ZIP, and rerun the controlled batch.

Guided screen 6 — Suppliers Import Report.

9. Open Output and Log Attachments

From the process details, open the PDF output for business validation messages and the log for execution-level diagnostics. Record the Process ID, Batch ID, ZIP file name, and run time in your migration evidence.

File	9842127.log	ESS_L_9842127	ESS Job Request Process Log

1

Open the PDF for business validation details.

2

Open the log for technical execution details.

Guided screen 7 — ESS output and log attachments.

```
SELECT *  
FROM POZ_SUPPLIERS  
ORDER BY CREATION_DATE DESC;
```

```
SELECT  
  VENDOR_ID,  
  VENDOR_NAME,  
  SEGMENT1,  
  PARTY_ID,  
  CREATION_DATE,  
  CREATED_BY,  
  LAST_UPDATE_DATE  
FROM POZ_SUPPLIERS  
ORDER BY CREATION_DATE DESC;
```

10. Error-Correction Runbook

Observed result	What it usually means	Next action
Load Interface File for Import fails	ZIP/control-file/load-stage problem	Check ZIP contents, template structure, file names and process log.
Load succeeds but Import Suppliers errors	Supplier business validation or reference-data issue	Open output/log, correct rejected source rows, regenerate the package and reprocess the controlled batch.
Only some suppliers reject	Record-level validation	Correct only the rejected data. Do not duplicate already imported suppliers.
No rows are selected	Batch/filter mismatch or no eligible interface rows	Verify BATCH_ID in POZ_SUPPLIERS_INT and the Batch ID entered on Import Suppliers.

POZ_SUPPLIERS_INT.IMPORT_ACTION identifies the operation requested for the supplier interface record. Validate the permitted values—including **CREATE**, **UPDATE**, and **DELETE** where applicable—against the Supplier FBDI template and documentation for your Oracle Fusion release.

11. Production Controls

- Use a unique, traceable Batch ID for each controlled migration wave.
- Archive the source workbook, generated ZIP, ESS Process IDs, output reports and correction history.
- Test the exact template and reference values in a non-production environment before production.
- Use least-privilege access for Scheduled Processes and BI Publisher diagnostics.
- For a full supplier model load, remember that suppliers can have related address, site, assignment, contact, classification, product/service and attachment interface objects; sequence the relevant supplier import processes appropriately.

12. Technical Reference

Oracle Fusion Cloud Procurement 26C provides a dedicated File-Based Data Import (FBDI) for Procurement guide. The Import Suppliers FBDI object uses SupplierImportTemplate.xlsm and the POZ_SUPPLIERS_INT interface table. Oracle Procurement documentation also describes loading data through Load Interface File for Import before running the supplier application import process.

This tutorial uses fictional ABC Company data. The Fusion-style screens are original training illustrations based on the workflow shown in the supplied reference photographs; they are not copied Oracle screenshots.
