

1. User Creation

2. Role Assignment

- Application Implementation Consultant >> Setups
- IT Security >> Create User, Roles etc.
- Employee

3. Roles:

- Job Role
- Duty Role
- Abstract Role
- Privilege

4. Define Implementation Project

5. Define Enterprise

6. Legal Entity

- Manage Legal Address
- Manage Legal Entity
- Define LDG (Manage Legislative Data Group)
- Attach LDG to Legal Entity (Manage Legal Entity HCM Information)

7. Ledger

Manage Currencies

Manage Accounting Calendar

Manage charts of Account

- Manage Charts of Account Valueset
- Manage Charts of Account Valueset Values
- Manage Charts of Account Structure
- Manage Charts of Account Instance
- Deploy Flex-field

Manage Primary Ledger

- Assign Legal Entities to Ledger
- Specify Ledger Options
- Assign Balancing Segment Values to Legal Entities
- Review and Submit Accounting Configuration

8. Business Unit

- Manage Locations
- Manage Business Unit
- Assign Business Unit Business Function

9. Hire Employee

- Manage Users
- Assign Roles to User
- Manage data access for users
- Run LDAP Program

Inventory Configurations:

1. Manage Locations – Item Master Location
2. Manage Locations – Inventory Organization Location
3. Manage Item Organizations
4. Manage Facility Shifts (Redwood Page)
5. Manage Facility Workday Patterns (Redwood Page)
6. Manage Facility Schedules (Redwood Page)
7. Manage Inventory Organizations
8. Manage Sub Inventories (Redwood Page)
9. Configure Sub inventories through Spreadsheet (Redwood Page)

Product Management Configurations:

1. Manage Item Life cycle phases
2. Manage item status
3. Manage Item types
4. Operational Attribute groups
5. Manage item Profile Options
6. Manage Item class
7. Manage Item catalogs (Redwood Page)
 - Catalogs
 - Categories
 - Sub Categories
8. Manage UOM
9. Manage delete groups

ITEM Creation:

Role: Product Manager

1. Create Item – Classic UI
2. Create Item – (Redwood Page)
3. Search Item – Classic UI, (Redwood Page)

Enable Redwood for Item:

Task: Manage Administrator Profile Values

Profile: ORA_EGP_VIEW_ITEM_REDWOOD_ENABLED

In the Profile Values section, set the Site level to Yes or No. The default value is No.

ESS job to create index definition and perform initial ingest to OSCI with the Index Name to Reingest parameter set to the appropriate index for the feature. Run this process for the following indexes:

fa-hcm-workerjourney

fa-hcm-workerjourneytask

fa-hcm-acl

Redwood: Create and Edit Items Using the Redwood User Experience

Duty Roles:

- Manage Item Redwood, Manage Item Redwood Items, Manage Item Redwood Attachments
- Manage Item Redwood Associations, Manage Item Redwood Item Categories, Manage Item Redwood Structures, Manage Item Redwood Relationships, View Trading Community Organization

Inventory Topics:

Roles:

- Inventory Manager
- Warehouse Manager

Concepts:

- Inventory Transactions (Redwood Page)
 - Miscellaneous Transactions
 - Sub inventory Transfer
 - Movement Request
 - Inter Org Transfer
- Inventory Controls (Redwood Page)
 - Lot
 - Serial
 - Grade
 - Stock Locator
 - Revision
 - Restrict Sub Inventory
- Inventory Accuracy Methods (Redwood Page)
 - Physical Inventories
 - Cycle Counting
- Inventory Planning Methods
 - Min Max Planning

Inventory Transactions:

1. Miscellaneous Transactions - (Redwood Page)
 - Miscellaneous Receipt (Redwood Page)
 - Miscellaneous Issue (Redwood Page)
 - Account Receipt (Redwood Page)
 - Account Issue (Redwood Page)
 - Account Allies Receipts (Redwood Page)
 - Account Allies Issue (Redwood Page)
2. Sub Inventory Transfer - (Redwood Page)
3. Movement Request – (Redwood Page)
 - With approval
 - Without Approval

Steps:

- Create Movement Request (Redwood Page)
- Submit Movement Request (Redwood Page)
- Confirm Picks (Redwood Page)
- Run allocation Process: Movement Request Pick Slip report (Redwood Page)
- Pick Confirmation (Redwood Page)

With approval Configuration:

- User
- Enable Approval for movement Request
- Configure Approval

Steps:

- Create Movement Request
- Submit Movement Request
- Approve Movement
- Confirm Picks
- Run allocation Process: Movement Request Pick Slip report
- Pick Confirmation

4. Inter Organization Transfer (Redwood Page)

- Direct (Redwood Page)
- Intransit

Configurations:

- Two Inventory Orgs
- Atleast 1 Sub inventory in Each Org
- Item must be part of both orgs.
- InterOrg Parameters (Redwood Page)
- Data access
- Item Class – add access for new org

Inventory Controls

1. Lot (Redwood Page)

Lot Generation – Org Level & Item Level
 Lot Control – No Control & Full Control
 Lot Expiration – User Shelf life days, Item Shelf Life Days
 Parent-Child Lot
 Practice: Lot Split, Lot Merge

2. Serial (Redwood Page)

Serial Generation – Org level & Item Level
 Serial Control – No Control, Predefine serial number

- Generate Serial Number Program
- Serial Sequence & Individual Serial number
- Item with Lot and Serial

3. Stock Locators (Redwood Page)

- Manage Inventory Value sets – FORMAT ONLY
- Manage Inventory locator key Flex fields (Row, Rack)
- Mange Flex field structure instance
- Deploy Flex-fields

Org Level	Sub Inventory Level	Item Level
No Control	No Control	No Control
Previously Define	Previously Define	Previously Define
Dynamic Entry	Dynamic Entry	Dynamic Entry
Determine at sub inventory level	Item Level	

Scenarios/ Test cases Covered during Class session: (Redwood Page)

- Locator Control at Org level: No Control & Previously Defined & Determine At Sub Inventory Level

- Locator Control at Sub Inventory Level: No Control & Previously Defined
 - Locator Control at Item Level: No Control & Previously Defined
4. Grade (Redwood Page)
Configuration: Lot Grades
 5. Revision
 6. Restrict Sub Inventory (Redwood Page)

Inventory Accuracy Methods:

1. Physical Inventories
2. Cycle Count

Physical Inventories: (Redwood Page)

- Create Physical Inventory (Redwood Page)
- Generate Physical Inventory Snapshot (Redwood Page)
- Generate Physical Count Tags (Redwood Page)
- Record Physical Inventory Tags (Redwood Page)
- Approve Physical Inventory adjustment (Redwood Page)
- Post Physical Inventory (Redwood Page)
- Purge Physical Inventory

Redwood Profile Options:

- Redwood Page for Physical Inventories Enabled
- Redwood Page for Physical Inventory Approvals Enabled
- Redwood Page for Record Physical Inventory Tags Enabled

Cycle Count Process: (Redwood Page)

- Item master - Item level enable Cycle count check box
- Manage ABC Classes (Redwood Page)
- Manage ABC Classification Sets (Redwood Page)
- Manage ABC Assignment Groups (Redwood Page)
 - Perform ABC Assignments (Redwood Page)
 - Update ABC Assignments
- Create Cycle Count (Redwood Page)
- Generate Count Schedule (Redwood Page)
- Generate Count Sequences (Redwood Page)
- Record Count Sequences (Redwood Page)
- Approve (If Tolerance) (Redwood Page)

Redwood Profile Options:

- Redwood Create Cycle Count Pages Enabled
- Redwood Cycle Count Pages Enabled
- Redwood Page for Perform Inventory ABC Analysis Enabled
- Redwood Page for Record Cycle Counts Enabled

Inventory Planning Methods:

1. Min Max Planning
 - Sub Inventory (Inventory)
 - Supplier (Procurement)
 - Inventory (Order Management)

Inventory setups:

1. Manage Inventory Profile Options
2. Account Allies (Redwood Page)
3. Inventory Reasons (Redwood Page)
4. Inventory Transaction Sources and Types (Redwood Page)
5. Movement Request Approval
6. Manage Receiving Parameters
7. Inter organization Parameters (Redwood Page)
8. Material Status
9. Configure item transaction defaults (Redwood Page)
10. Lot Grades (Redwood Page)
11. Lot Expiration Action (Redwood Page)
12. Manage Inventory Lookups

Inventory Forms:

1. Item Quantities /Manage Item Quantities (Redwood Page)
2. Review Completed Transactions (Redwood Page)
3. Lots and Serial Numbers (Redwood Page)

Additional Concepts:

- Sub Inventory Transfer Between Locators within Same Sub inventory
- Item Transaction Defaults Using Spreadsheet

Task: Manage Inventory Profile Options

- Redwood: Inventory Landing Page
- Redwood: Manage Transaction Sources and Types Using a Redwood Page
- Redwood: Manage Pending Transactions Using a Redwood Page
- Redwood: Use Saved Searches on Redwood Pages
- Redwood: Manage Material Statuses Using a Redwood Page
- Redwood: Confirm Picks Using a Redwood Page
- Redwood Page for Reservations and Picks Enabled
- Redwood Page for Movement Requests Enabled
- Redwood Page for Confirm Pick Slips Enabled
- Redwood Create Cycle Count Pages Enabled
- Redwood Cycle Count Pages Enabled
- Redwood Page for Perform Inventory ABC Analysis Enabled
- Redwood Page for Record Cycle Counts Enabled
- Redwood Page for Physical Inventories Enabled
- Redwood Page for Physical Inventory Approvals Enabled
- Redwood Page for Record Physical Inventory Tags Enabled

ESS job to create index definition and perform initial ingest to OSCI

1. Search and select process name: Transform Data Post Upgrade

Parameter Value for Feature Name: POPULATE_ELASTIC_INTERMEDIATE_TABLE

Inventory Configuration List:

1. Manage Locations – Item Master Location
2. Manage Locations – Inventory Organization Location
3. Manage Item Organizations
4. Manage Facility Shifts (Redwood Page)
5. Manage Facility Workday Patterns (Redwood Page)
6. Manage Facility Schedules (Redwood Page)
7. Manage Inventory Organizations
8. Manage Sub Inventories (Redwood Page)
9. Configure Sub inventories through Spreadsheet (Redwood Page)
10. Manage Inventory Profile Options
11. Account Allies (Redwood Page)
12. Inventory Reasons (Redwood Page)
13. Inventory Transaction Sources and Types (Redwood Page)
14. Movement Request Approval
15. Manage Receiving Parameters
16. Inter organization Parameters (Redwood Page)
17. Material Status (Redwood Page)
18. Configure item transaction defaults (Redwood Page)
19. Lot Grades (Redwood Page)
20. Lot Expiration Action (Redwood Page)
21. Manage Inventory Lookups

Oracle Cloud Procurement:

- Supplier Management
- Self Service Procurement
- Sourcing
- Purchasing
- Supplier Qualification Management
- Procurement Contracts

Supplier Management:

1. Specify Supplier Numbering Sequence
2. Manage Supplier Type Look-up
3. Tax organization Look-up
4. Manage Supplier Product and Service Category
5. Manage Supplier Descriptive Flexfield
6. Supplier Registration Configuration (New Supplier Registration)
7. Configure Supplier Registration and Profile Change Request / Supplier Profile Change Request Configuration
8. Configure New Supplier Notification
9. Manage Business Classification Lookup
10. Manage Internal Supplier Registration Approvals
11. Manage Internal Supplier Profile Change Approvals
12. Manage Supplier Registration Approvals – External Supplier Registration Approval
13. Manage Supplier Profile Change Approvals
14. Manage Supplier Spend Authorization Approvals

15. Manage Supplier User Role

Supplier Types:

- Prospective Supplier
- Spend Authorized Supplier

Access Needed for Creating Supplier

- Employee
- Supplier Manager Role
- Buyer Setup
- Manage Data access for Business Unit (if supplier form not open)

Supplier Flow:

- Supplier
- Supplier Address
- Supplier Site
- Site BU Assignment
- Supplier Contacts
- Supplier Qualifications
- Supplier Payments

Supplier Portal (SP):

1. Manual Supplier Creation

- Prospective Supplier
- Spend Authorized Supplier

2. Internal Supplier / Registration

- Prospective Supplier
- Spend Authorized Supplier

3. External Supplier Registration

- Prospective Supplier
- Spend Authorized Supplier

4. FBDI Process - 2 OR 3

5. Promote Prospective Supplier as Spend Authorization

6. Supplier Approval Process – internal & External

7. Supplier profile Change Approval Process- Bank Account Change / Address Change

Scenarios:

- New Supplier want to be on-boarded
- Supplier approver wants to approve supplier registration
- Supplier Administrator wants to search Supplier with Supplier Number/Name
- Supplier Administrator wants to search Suppliers with Business classifications/Supplier Type
- Supplier Administrator wants to share same supplier across different Business Units
- Supplier Administrator wants to create Parent- Child relationships
- Inactive Supplier
- Merge Supplier

Manage Administrator Profile Values

- Redwood Page for Supplier Management Enabled > Supplier Creation Page
- Redwood Pages for Supplier Profile Enabled >> Manage by Supplier
- Redwood Manage Supplier Registration Pages Enabled
- Redwood Company Profile in Supplier Portal Pages Enabled
- Enable the Redwood manage supplier registration

- **Enable Redwood Supplier Management**
- **ESS job to create the index definition and perform the initial ingest to OSCI**
