

➤ Oracle Fusion SCM – PIM Series(Part 3)

Setup of Lifecycle Phases for OPPO Enterprise

➤ **Prepared by: [Chinna Narasimhulu Gadena]**

➤ **Introduction :**

In Oracle Fusion PIM, Lifecycle Phases define the stage of an item during its lifecycle — from design to retirement.

They help control when an item can be used in procurement, manufacturing, and sales.

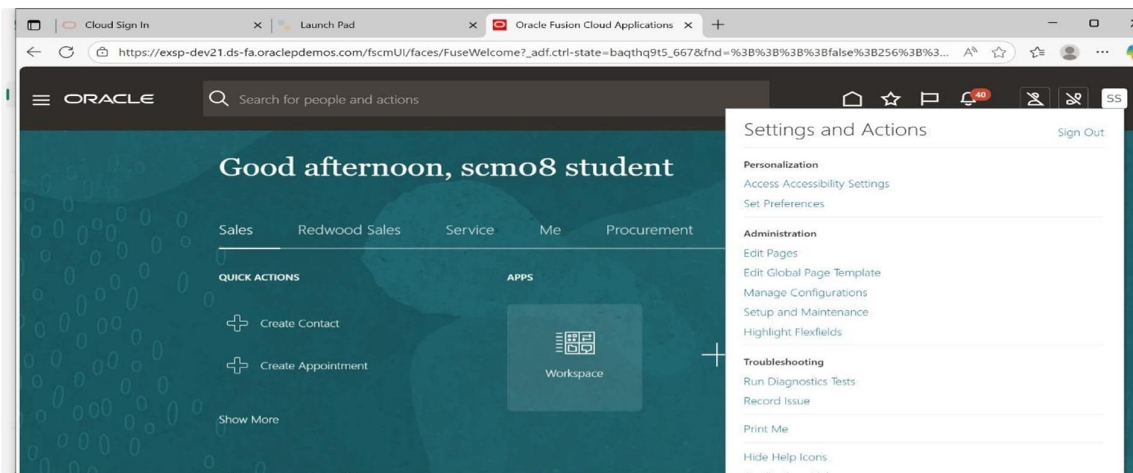

✚ Note: Oracle provides some default lifecycle phases (Design, Prototype, Production, Obsolete).

For learning purposes, I created my own Oppo lifecycle phases so I can use them consistently across my PIM examples.

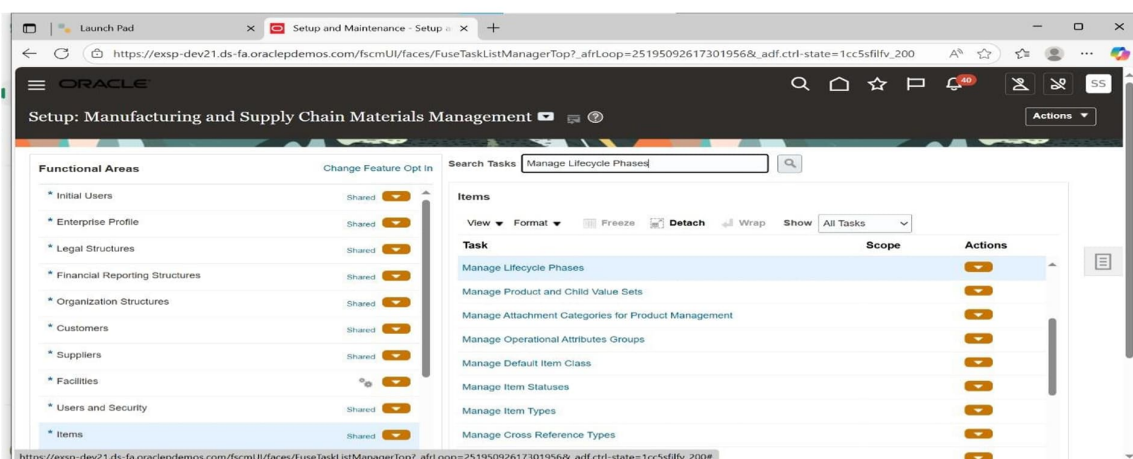

➤ Navigation to Manage Lifecycle Phases

From the Home Page, go to:

→ Setup and Maintenance

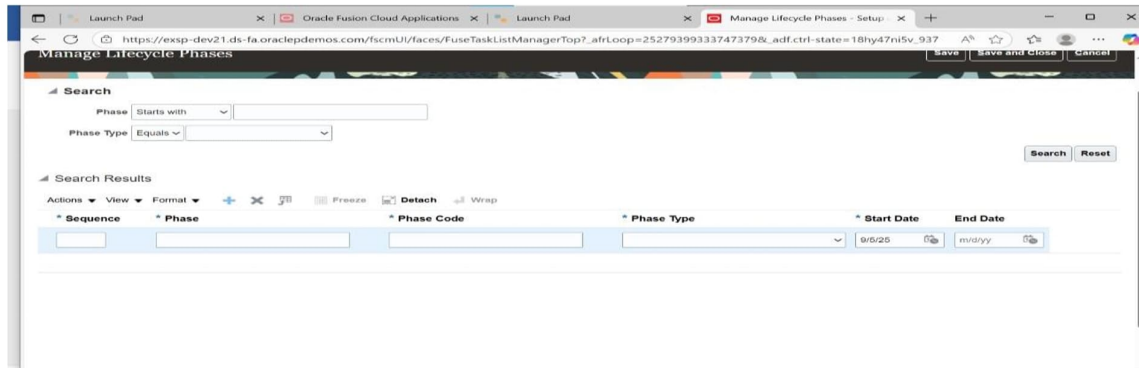

→ Search for Manage Lifecycle Phases

Normally, Oracle provides some default phases like Design, Prototype, Production, Obsolete.

👉 But in this instance, the screen was empty.

So, for learning purposes, I created my own Oppo phases.

Oppo Design → Initial design stage

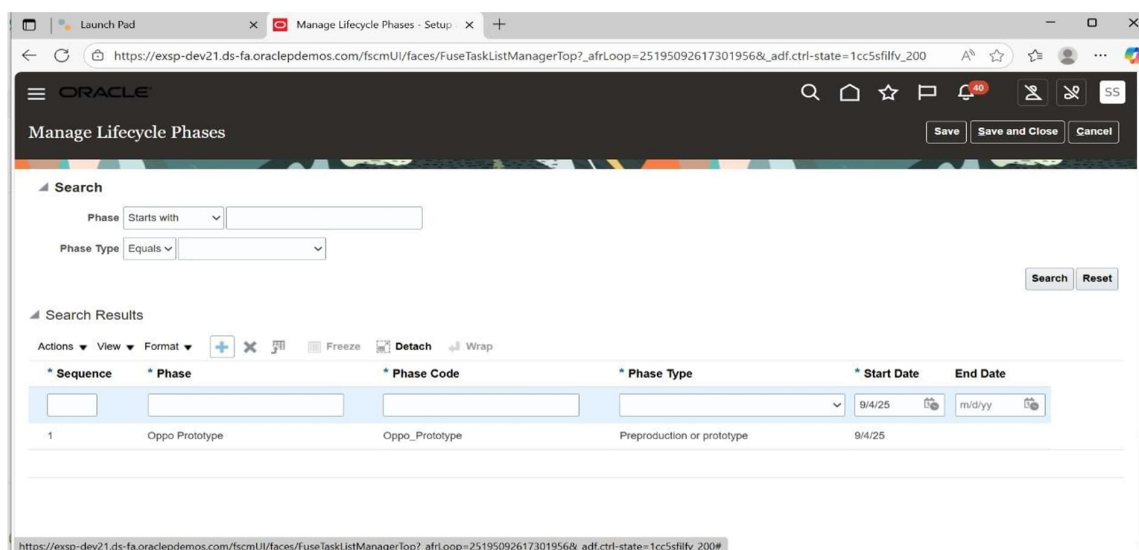

Oppo Prototype → Pre-production / prototype stage

Oppo Production → Full production stage

Oppo Obsolete → End of life

To add a new phase, click on the “+” symbol on top.

4	Oppo Obsolete	Oppo_Obsolete	Obsolete	9/4/25	m/d/yy
3	Oppo Production	Oppo_Production	Production	9/4/25	
2	Oppo Design	Oppo_Design	Design	9/4/25	
1	Oppo Prototype	Oppo_Prototype	Preproduction or prototype	9/4/25	

➤ Key Takeaways

Lifecycle Phases help control when and how items are used in business processes.

Common sequence: Design → Prototype → Production → Obsolete.

Custom Oppo phases allow flexibility for practice and learning.

Next Steps in PIM Series:

And next parts, we will configure:

Part 4: UMO

Part 5: Item Classes

Part 6: Item Catalogs

Part 7: Item Categories.
